

CERTIFICATE

This is to certify that Marcelo Lazo Duabyakosky, member of the Faculty of Engineering Council at the Universidad Privada de Santa Cruz de la Sierra (UPSA), confirms that Enrique Alejandro Arce actively participated as a researcher in the research project titled **"Intelligent Model for a Sustainable Energy System in Bolivia (MOISES)"**, conducted between November 2023 and December 2024.

The objective of this project is to address the energy crisis in Bolivia and establish a network for academic exchange and collaboration between Texas A&M University (TAMU) and UPSA. By developing convergent decision-making frameworks, the project aims to advance knowledge towards the transition to a more sustainable energy system for Bolivia.

During his participation, Enrique demonstrated a high level of commitment, responsibility, research skills, and teamwork, significantly contributing to the achievement of the project's objectives and the strengthening of international collaboration in the academic and scientific fields.

In recognition of his valuable contribution to this important project, this certificate is granted with our gratitude and best wishes for his future academic and professional achievements.

Santa Cruz de la Sierra, January 2, 2025

Sincerely,

MSc Marcelo Lazo Duabyakosky
Permanent Faculty Member
Member of the Faculty of Engineering Council
Universidad Privada de Santa Cruz de la Sierra (UPSA)
